

Installing Upgrade Patch for East 5.2 to East 5.3

Applies to Both MS Office 2003 and 2007 Patches

System requirements to run East 5.3:

A system running one of the following operating systems: **Windows 2003/XP or Vista**

- A minimum of 256 MB RAM (512 MB recommended)
- A hard disk with at least 25 MB of free disk space
- Microsoft Excel 2003 (SP3 or higher) or Excel 2007 version – make certain the downloaded patch file from Cytel matches your version of MS Office/Excel.

To install the patch:

Close any instance of East and Microsoft Excel already running.

If you have installed East 5.2 for Excel 2003, please make sure that you are using the patch meant to work with the same version of Excel. Similarly if you have installed East for Excel 2007, please use the corresponding patch.

Double-click the patch executable. It will display the installation wizard on the screen.

The wizard will guide you through some simple steps. Please follow the steps on the screen to complete the installation.

NOTE: This patch works for upgrading from East 5.2 to East 5.3 only. It cannot be used to upgrade from any other versions.
